DETAILED ACTION

1. Claims 1-16 are presented for examination. Claims 1, 5, 8, and 13 have been amended.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. Referring to claim 16, line 1,
--The arrangement of claim 8-- has been inserted, replacing
"The method of claim 1".

Claim Rejections - 35 USC § 112

3. Rejections withdrawn.

Claim Rejections - 35 USC § 102

4. Rejections withdrawn.

Allowable Subject Matter

5. Claims 1-16 allowed.

The following is an examiner's statement of reasons for allowance:

While, Umekita teaches a method of designing the control of a computer by compiling a source program into object programs for parallel processing by a multi-processor system.

And, Kikuchi teaches the design of a control system capable of controlling in parallel a plurality of processing portions each of which has an individual function or soft modules acting in association as a system.

And, Dummermuth teaches designing the control of a complete industrial process by breaking down an industrial control program into smaller tasks, and the ability to execute separate tasks in an apparently simultaneous fashion to control the number of instructions in each task so that a given task may be ensured complete execution prior to task switching.

Neither Umekita, Kikuchi, or Dummermuth, taken either alone or in combination disclose a method/apparatus for designing a control of a complete process in the art of industrial manufacture having all the claimed features of applicant's instant invention, specifically including: generating a respective set of state transitions to represent each functionality that has been identified. Also, there is no motivation to combine these references to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
